

Boldr Watch — Frequently Asked Questions

Last updated: May 2026 | Maintained by CS Team

Materials & Safety

Q: Are Boldr watch straps BPA-free? A: Yes. All Boldr FKM rubber and silicone straps are 100% BPA-free. This applies to all current strap SKUs in the catalogue. The leather and nylon NATO straps do not contain BPA by composition.

Q: What grade of titanium is used in the Expedition case? A: The Expedition uses Grade 5 Titanium (Ti-6Al-4V), which is the aerospace-grade alloy — approximately 45% lighter than stainless steel and significantly more corrosion-resistant. The Journey uses Grade 2 (commercially pure titanium), which is slightly softer but still very durable.

Q: Is the watch safe for children? A: The Expedition and Journey models are designed for adults. That said, all materials are EU REACH and RoHS compliant, meaning they meet European safety standards for hazardous substances. The rubber straps are BPA-free and non-toxic. We recommend adult supervision for children wearing any watch.

Q: Do the straps contain nickel? A: The FKM rubber and nylon NATO straps are nickel-free. The metal buckle on leather straps is made from Grade 5 titanium, which is also nickel-free. The mesh bracelet uses 316L stainless steel — trace nickel content is present (as with all stainless steel). If you have a severe nickel allergy, we recommend the rubber or NATO strap options.

Q: Is the luminous material on the dial safe? A: Yes. Boldr uses Super-LumiNova (BGW9 or C3 grade depending on model), which is a non-radioactive photoluminescent pigment compliant with ISO 3157. It is completely safe for everyday wear.

Q: Does the watch meet EU safety standards? A: Yes. All Boldr watches are EU REACH compliant and RoHS compliant. Documentation is available upon request.

Engraving

Q: Can I get the caseback engraved? A: Yes. We offer caseback engraving in Roman/Latin script, Chinese/Japanese/Korean characters, and Arabic script. Pricing starts at SGD 25 for up to 20 characters. See our engraving rate card for full pricing.

Q: How many characters can I engrave? A: Up to 60 characters maximum on the caseback. For Latin script: up to 20 characters at SGD 25, 21–40 at SGD 40, then SGD 1.50 per additional character. For CJK or Arabic: SGD 3.00 per character, up to 15 characters.

Q: Can I engrave a logo or image? A: Yes, for an additional SGD 60. You must supply a vector file (.ai or .svg). Our team will review the design for feasibility before confirming.

Q: How long does engraving take? A: Standard engraving adds 2–3 business days to processing time. Rush same-day engraving (SGD 20 surcharge) is available for orders placed before 12pm SGT, subject to availability.

Q: Can I change the engraving text after ordering? A: If you contact us within 1 hour of placing the order, we can amend the text at no charge. After 1 hour, a SGD 15 correction fee applies. Once engraving has begun, changes are not possible.

Q: Can the strap buckle be engraved? A: Yes, for metal buckles only (not rubber or NATO straps). Up to 10 characters for SGD 15.

Strap Compatibility

Q: What lug width do Boldr watches use? A: All current Boldr models (Expedition and Journey) use a 20mm lug width. This is a standard size compatible with most third-party straps.

Q: Are the straps quick-release? A: Yes. All Boldr straps use a quick-release spring bar mechanism — no tools required to swap straps.

Q: Can I use a NATO strap on the Expedition? A: Yes. Any standard 20mm NATO strap is compatible with the Expedition and Journey.

Q: Can I swap straps between the Expedition and Journey? A: Yes. Both models share the same 20mm lug width, so all Boldr straps are interchangeable between the two.

Q: What strap do you recommend for swimming? A: The FKM rubber strap is the best choice for water activities — it is waterproof, quick-drying, and salt-resistant. The nylon NATO strap is also water-resistant but takes longer to dry. We do not recommend the leather strap for regular water exposure.

Q: How do I care for the leather strap? A: Keep the leather strap away from prolonged water exposure. Apply a small amount of leather conditioner every 3–6 months. Avoid direct sunlight for extended periods to prevent fading.

Watch Servicing

Q: How much does a battery replacement cost? A: SGD 35, with a 3–5 business day turnaround. This includes a basic water resistance test and function check.

Q: What is included in a Full Service? A: The Full Service (Standard, SGD 160) includes full movement disassembly, ultrasonic cleaning, lubrication, regulation to ± 5 s/day, water resistance test, case light polish, and new gaskets. The Premium tier (SGD 220) adds deep case polish, crystal replacement if scratched, and a 12-month service warranty.

Q: My watch is losing time. What service do I need? A: If your watch is losing or gaining more than 15 seconds per day, a Regulation Service (SGD 85) is recommended. This includes movement cleaning and regulation to ± 5 s/day with a timing machine report.

Q: How often should I service my watch? A: We recommend a Full Service every 3–5 years for automatic movements, or when you notice significant timekeeping deviation.

Q: How do I send my watch in for servicing? A: Pack your watch securely and ship it to our Singapore service centre (address provided at checkout). We recommend insured shipping. For international customers, a SGD 25 surcharge covers insured return shipping.

Q: Is there a warranty on servicing? A: The Premium Full Service includes a 12-month service warranty. A 12-month warranty extension can be added to any service for SGD 30.

Orders & Shipping

Q: How long does shipping take? A: Standard shipping within Singapore: 3–5 business days. International: 7–14 business days depending on destination. Express shipping is available at checkout.

Q: Do you ship internationally? A: Yes, we ship worldwide. Customers are responsible for any applicable customs duties and import taxes in their country.

Q: What is your return policy? A: We accept returns within 14 days of delivery for unworn, unmodified items in original packaging. Engraved items are non-returnable unless there is a manufacturing defect.

Q: My order hasn't arrived. What should I do? A: Please check your tracking number first. If tracking shows no update for more than 5 business days, contact us at support@boldr.co with your order number and we will investigate.

General

Q: What is the warranty on Boldr watches? A: All Boldr watches come with a 2-year manufacturer's warranty covering movement defects. The warranty does not cover physical damage, water damage beyond the rated depth, or normal wear and tear.

Q: Do you offer gift wrapping? A: Yes. Select the gift wrapping option at checkout (SGD 8). The watch will be presented in a premium gift box with a ribbon and a personalised gift card.

Q: What is the difference between the Expedition and Journey? A: The Expedition (40mm, Grade 5 Ti) is larger, heavier-duty, and rated to 100m water resistance — suited for active use. The Journey (38mm, Grade 2 Ti) is slimmer, lighter, and more dress-casual — rated to 50m. Both use automatic movements.

Q: Do you offer bulk/corporate pricing? A: Yes. For orders of 10 or more watches, please contact us at corporate@boldr.co for a custom quote.
